GE – Grade Equivalent reflects the grade level our students are working at compared to the national norm.

The first number in the GE SCORE point system indicates the grade level and the second number is the month. For instance the 2nd grade tested at grade level 2 in the 7th month in Reading. Grade level for this test was 2.1.

The **Percentile** reflects where students stand nationally with 50 percentile being at grade level. 71 percentile means the students in 2nd grade are reading better than 71 % of other 2nd graders nationally.
